(54) Title: SHOE PROVIDING VERTICAL/HORIZONTAL HEEL PRESSURE DIMINISHMENT

(57) Abstract: The modified oxford shoe (10) providing vertical and horizontal heel pressure diminishment including an optional means of adjusting pronation is an inventive device which diminishes pressures to the heel with a floating collar and supple counter assembly with adjusting strap, with spacing studs attached strategically to the sides of the midsole (15) to prevent exterior pressure to the heel and with a multi functioning cushion assembly coupled with adjustable underlying steel springs and resilient midsole (15) and wearing surface (17) to diminish pressure to the bottom of the heel and provide pronation adjustment if needed.
